

BD Medical Tour | Biological Engineering

10/06/2016

On October 6, 2016, 19 students, mostly from the Biological Engineering Department, traveled to Sandy, UT to tour BD Medical. Students were able to experience a medical manufacturing company first hand. They were able to see the various steps that go into the research, development, production, and quality control when producing and streamlining a product. The tour featured questions and answers about what BD Medical does, career and internship opportunities, and a walk-through of the manufacturing facility.
